### ORIGINAL POETRY.

MESSES. EDITORS.

Messus. Editors,

I see that my humble production (for the insertion of which I thank you,) has been answered with considerable spirit and talent by W. C. B. Believe me that I left a pleasure in reading it, hough against myself, and it is a source of prite to think that I drew it from him. He seems by the tenur of his piece to suspect that I am a personal enemy and not a female. He is wrong—to say that I do not know him, would be faise; but I only slightly know him, so slightly, that, pechaps, he does not know me. I am by no means prejudiced against him, and was I to mention my name (which I perhaps may at some future period,) the Dr.\* would himself be convinced that there was no objection lut to his supposed sentiments.

As to Paul Pry whose production, I wondered to see published, (but it was fair to hear both sides). I have merely answered became I suspect he would rather be bashed than not noticed, a thing by no mevor uncommon with fittle minds. It appears, and I am sorry that it does so, as if W.C. B had mustered up his friends to defend him against poor Juliet. Yet I will be just—I do not think that he would have asked the succour of such a champion; he does not need it, and he should be the public know that such was not the case.

As to myself you will confer a favor by inserting the enclosed pieces; I have others by me, of a different character, which I will send you for fear that poor Juliet should be considered all bitterness, without an attribute of her sex. poor Juliet should be considered all bittern without an attribute of her sex.

ESSAY ON THE TRUE END OF FEMALE

EDUCATION. We have reached that period of society when it would be absurd to advocate the im- ble prospects of life. It is the first step to portance of female education. Our cities are dereliction from principle and morality; erfilled with seminaries of a high order; every ror does not start forth from the brain full species of literary instruction is open to girls equally as to boys. The rich treasures of the South have become tributary to the once barren region of the North, and the wilderness has been made to blossom as the rose tree. It is the fashion of the age in which we live to be well educated. Minds, of a high order, think it but will feel that it is like the dew of Heano degradation to devote their powers to female instruction; men, whose telents qualify them for the pulpit or the bar, have cluthed science in female habiliments, and wsociated it with the distaff and the needle.
